Retreat House – 1st Prize
Winner (Belian) of the
Malaysian Wood Awards"
By Ar Almaz Salma
Abdul Rahim
- 11.00 am** Q & A Session
- 11.30 am** End of Talk

The Kuang Retreat House was recently named the 1st Prize winner under the Residential Category of the inaugural Malaysian Wood Awards 2017. It also won the Silver Award of the My Dream Home Award in 2009.

An astonishing property constructed primarily of recycled timbers, Kuang Retreat is a structure that has been put together by traditional building methods and designed with due respect to the elements and its natural surroundings. The Kuang Retreat shows how the lifespan of timbers can be further extended by re-using them in newer applications. The house has been built from timbers such as Chengal, Balau, Kempas and Merbau.

The owner, who is also the architect, has brought the best out of these timbers by showcasing their strength and dignity as a resilient, flexible and environmentally friendly building material. The possibilities of using timber for either structural or decorative purposes are only limited by one's imagination. From paneling to moulding, fencing to flooring and cladding to roof trusses, the options are endless.

For builders and practicing architects who are looking for an aesthetically pleasing yet sturdy building material which exudes warmth and class, timber is an excellent choice.

Ar Almaz Salma Abdul Rahim will tell us how the Kuang Retreat House came about, the inspiration that gave birth to this award-winning property. Almaz, who is the founder of Almaz Architect Sdn Bhd, is well-known for her distinctiveness in her architectural sense. She is passionate about her work and is always happy to share her knowledge on designing and building with timber. She has also won numerous awards in Malaysia.

*Admission is free but seats are limited. To secure your seat, please complete the form below and fax it to us at 03-9282 8999 before **14 August 2017**.*
