

Construction timber e-book launched

The Malaysian Timber Council celebrated the launch of its latest version of its electronic guidebook with the title: *Guidebook on Schedule of Maintenance for Timber in Construction*.

The e-book was launched at a special ceremony, attended by the Editor, on the second day of the Wood Expo.

Richard Yu and Wong Kay Cane of the MTC said the council produced the "Invaluable e-guidebook at the request of the timber producing industry and their customers". It is a manual on how to care for and preserve timber-based materials used for construction purposes in indoor and outdoor use.
